

The Breitling Jet Team soars over the Great Wall of China

The Seven L-39c Albatros jets of the Breitling Jet Team soar in close formation over the Great Wall of China, as the grand finale of their 2013 Asian tour.

Flying less than three meters apart and with speeds of up to 750km/h the pilots, shown here in the famous Avenger formation, navigate their way low-level over the challenging mountainous landscape of the Karamay region of North Western China.
